

Advantages of Other 3M™ Window Films Products

3M Window Films address the three major causes of fading.

3M Window Films are designed to reduce the effects of solar heat and visible light on your furnishings and will block up to 99% of the sun's harmful ultraviolet rays, which are the single largest cause of fading. Depending on the film you chose, you can enjoy a 79% reduction in the sun's heat. While no film can stop fading completely, our films dramatically slow the progress of fading to keep your home looking beautiful.

Increased comfort and energy savings.

On a warm day, the sun shining through your windows can drastically increase the warmth of a room. Not only do you become more uncomfortable, all that heat is costing you money when your air conditioner tries to keep up. By rejecting up to 79% of the sun's heat, our film can significantly reduce your energy bill. The Skin Cancer Foundation recommends many 3M Window Film products as effective UV protectants.

Reduced glare.

Few things are as frustrating as working on a computer screen or trying to watch television in a sunlit room. By significantly reducing glare, our films help you do your work or relax without the added eyestrain from excessive light.

Our authorized dealers are ready to help you. Contact your local authorized 3M Window Films dealer for a free estimate. For more information, please call 1-800-480-1704 or visit us at www.3M.com/windowfilm

A Welcome Addition To Your Home Or Office.

Now, even the light that fills your home can be just the way you want it. The new 3M line of Night Vision window film offers protection from the sun's damaging UV rays and controls heat and glare, while inviting warm, natural light into the room and increasing comfort. And, unlike most other sun control films, 3M™ Night Vision Window Film has a low interior reflectivity that leaves your view clearer than ever, especially at night. That powerful combination makes Night Vision film a welcome addition to any home or office.

3M™ Night Vision Window Film Is Ideal For Homeowners Or Building Owners Who Want To

- Enjoy clear views, day and night
- Protect skin and furnishings from damaging UV rays
- Reduce heat and glare
- Preserve a room's warmth and natural beauty
- Avoid heavy window coverings

The low interior reflectivity of 3M™ Night Vision window film leaves your view clearer—especially at night.

3M: A Name You Can Trust.

3M developed Night Vision film with a technology that maximizes sun control capabilities while toning down the interior reflectivity to allow for clear, unobstructed views, an uncommon feature among many sun control window films. The same technology also makes the films color-stable, significantly reducing the fading that can happen over time with dyed films. The new line of 3M™ Night Vision Window Film comes in three shades—NV-15, NV-25, NV-35—from darkest to lightest. Depending upon the location of your windows your authorized 3M window film dealer can help determine which shade is right for you. As with other 3M window films, Night Vision film carries a limited lifetime warranty for as long as the buyer lives in the home. For commercial buildings, Night Vision comes with a 12 year warranty.
